Campaign
2 Valley Road
Bow, NH 03304**

I believe the State of New Hampshire is an independent constitutional body that is protected from the now intrusive federal government and if elected I will do all in my power to protect that independence. I support the tenth amendment of the United States constitution.

The two major parties have made a mockery of our three branches of government by completely disregarding the constitution. The money being spent to be elected only supports a corrupt media and helps complete the cycle again and again. With your support it can be stopped.

Biographical Data and Political Experience

Birth Date: February 16, 1941

U.S. Senate, 1996 / 2002 /
2004 / 2008
- Libertarian Candidate for
NH. Governor, 1998

*Introducing
Ken Blevens
Libertarian Candidate
for U.S. Senate*

*"When the price to support
government and the cost to protect
oneself from it becomes too great, it's
time to say
'ENOUGH IS ENOUGH'
and vote Libertarian."*

**New Hampshire 2010 Libertarian
Party Candidate**

Is our Constitutional Republic in jeopardy? YES

Like wind and time has destroyed this flag the intent of the thirteen original states as enumerated in the constitution has also been destroyed.

My first priority if elected will be to restore and apply the original meaning and intent of the constitution to every vote on every issue that shall come before me.

ISSUES

Health Care:

To correct health care we must first address problems created by the federal and state governments. The best example is the cry for the ability for health insurers to be able to cross state lines. Who is restricting insurers from crossing state lines? Government is the problem, as the Libertarian Presidential candidate once said “Government can’t give you anything unless it takes it from you first.”

Education:

First let me say I support TLC, total local control, of education. Local control creates competition between students, schools and towns and is the greatest motivator for individual improvement. Top down education concentrates on groups and averages and the results are clear. The best results would come from less federal intervention not more.

Wars:

In the 2002 election the Libertarian candidate for U.S. Senate was opposed to the war in Iraq. Now eight years later the war front has extended to Afghanistan and beyond. Had we used letters of marque and reprisal, a constitutional option, fewer lives would have been lost.

Second Amendment:

The right to bear arms is essential for the protection of the citizens from an over intrusive government and for self defense.

Bank Bailouts and Stimulus Money:

The banks should have been allowed to fail which would have been the right correction. Stimulus money is the debt we will leave our children and grand children. How can anyone be proud of that. It is truly time for a change from the two party system now in Washington.

Abortion:

I am pro-choice as I do believe that moral choice can best be made by the woman and the father not by the government.

The Candidate;

I am proud that I have been accused of being a strict constitutionalist. My interest in becoming your United States Senator is to protect and defend our constitutional republic by adhering to the supreme rule of law, the constitution. Thank you for your consideration and hopefully your vote.

*For Liberty,
Ken Blevens*
